Chitragong,  
The 26th December 1919.

G. A. WILBY,  
Acting Chief Auditor.

Report on the Weather and Crops for the week ending the 2nd January 1920.

SUMMARY.—Weather seasonable and favourable. Harvesting of winter rice, plucking of cotton-pressing of sugarcane, ploughing for spring rice in Sylhet and preparation of land for *jhumming* are in progress. Outturns of winter rice and cotton are fair to good and of sugarcane good. Prospects of standing crops are fair. Cattle-disease is reported from three districts. The price of common rice has fallen slightly.

Serial No.	Districts and subdivisions.	Rainfall at head-quarters stations.	Price of common rice, in seers, per rupee.		Character of the weather, etc.
			This week.	Previous week.	
1	2	3	4	5	6
1	CACHAR ... (SILCHAR).	Nil	7	6½	Weather seasonable and favourable. Harvesting of winter rice and pressing of sugarcane continue. Outturn of winter rice is fair except in North Cachar Hills where the crop is a failure on account of drought.
	Hailong ...	Nil	5	5	
	Hailabandi ...	Nil	7	7	
2	SYLHET ...	Nil	7½	7½	Weather seasonable. Ploughing for spring rice continues. Harvesting of winter rice is nearly finished. Prospects and outturns of cotton, sugarcane, and other winter crops are good.
	Sunamganj ...	Nil	8	7	
	South Sylhet ...	Nil	8	8	
	Karimganj ...	Nil	7	7	
	Habiganj ...	Nil	8½	8½	
3	KHASI AND JARWA HILLS (SHILLONG).	Nil	5½	5½	Weather seasonable and favourable. Harvesting of winter rice and preparation of land for summer crops are in progress. Prospects of cotton are fair.
	Jowai ...	Nil	5½	5½	
4	NAGA HILLS (KOHIMA).	10	8½	8½	Weather fine and cold. Preparation of land for <i>jhumming</i> continues. Cattle-disease is reported from places.
	Mokokchung ...	63	11	10	
5	LUSHAI HILLS (AIZAL).	Nil	5½	5	Outturns of crops are on the whole disappointing.
	Lungleh ...	Nil	6	5	
6	G O'ALPARRA (DHUBRI).	Nil	6	6	Weather seasonable and favourable for standing crops. Harvesting of winter rice and pulses continues. Prospects of crops are fair.
	Goalpara ...	Nil	7	6	
7	KAMRUPT (GAIRWATI).	Nil	6	6	Weather seasonable and favourable. Harvesting of winter rice is in progress and outturn good.
	Barpeta ...	Nil	6½	6½	

§ Not reported.

Report on the Weather and Crops for the week ending the 2nd January 1920—concluded.

Serial No.	Districts and subdivisions.	Rainfall at head-quarters stations.	Price of common rice, in seers, per rupee.		Character of the weather, etc.
			This week.	Previous week.	
1	2	3	4	5	6
8	DARRANG (TEZ-PUR).	Nil	7	7	Weather cold and favourable for standing crops. Harvesting of winter rice continues with fair outturn.
	Mangaldai ...	·02	7	6	
9	NOWGONG ...	Nil	6½	7	Weather seasonable and favourable. Harvesting of pulses and winter rice and pressing of sugarcane are in progress. Outturns of pulses and winter rice are normal and of sugarcane good. Cattle-disease is reported from places.
10	SIBSAGAR (JORHAT).	·04	6½	6½	Weather seasonable. Pressing of sugarcane and harvesting of winter rice are in progress. Prospects of crops are fair.
	Sibsagar ...	Nil	8	8	
	Golaghat ...	Nil	6	6	
11	LAKHIMPUR (DIBRUGARH).	·02	5½	5½	Weather seasonable and favourable. Harvesting of winter rice and pressing of sugarcane continue. Prospects of crops are fair. Cattle-disease is reported from three mauzas in each one in North Lakhimpur subdivision.
	North Lakhimpur.	Nil	8	8	
12	SADIYA FRONTIER TRACT (SADIYA).	Nil	4	4	Weather and prospects of crops are good.
	Pasighat ...	Nil	5	5	
13	GARO HILLS	Nil	5½	5½	Weather seasonable. Harvesting of winter rice and plucking of cotton continue. Outturn of winter rice is fair and of cotton good. Ploughing for autumn rice and jute is in progress. Prospects of mustard are fair.

Sanitary Commissioner, Assam.

## Report on the Weather and Crops for the week ending the 9th January 1920.

**SUMMARY.**—Weather seasonable and favourable. Harvesting of winter rice and pulses, plucking of cotton, ploughing for and transplanting of spring rice in Sylhet and pressing of sugarcane are in progress. Ploughing for autumn rice and jute has commenced in places. Outturns of winter rice and pulses are fair to good and of cotton and sugarcane good. Prospects of mustard are fair. Cattle-disease is reported from three districts. The price of common rice is practically stationary.

Serial No.	Districts and subdivisions.	Rainfall at head-quarters stations.	Price of common rice, in seers, per rupee.		Character of the weather, etc.
			This week.	Previous week.	
1	2	3	4	5	6
1	CACHAR (SILCHAR).	Nil	8½	7	Weather seasonable and favourable. Harvesting of winter rice and pressing of sugarcane continue. Outturn of winter rice is fair except in North Cachar Hills.
	Hailong	Nil	5½	5	
	Hailakandi	Nil	7	7	
2	SYLHET	Nil	7½	7½	Weather seasonable. Plucking of tea and ploughing for and transplanting of spring rice are in progress. Harvesting of winter rice is nearly finished. Prospects and outturns of winter rice, cotton, sugarcane and mustard are good and of tea fair.
	Sonamganj	Nil	7½	8

Calcutta,

The 9th January 1920.

G. A. WILBY,

Acting Chief Auditor.

Report on the Weather and Crops for the week ending the 16th January 1920.

**SUMMARY.**—Weather seasonable and favourable. Harvesting of winter rice is nearly finished, that of pulses, plucking of cotton, pressing of sugarcane and ploughing for and transplanting of spring rice in Sylhet, continue. Ploughing for autumn rice and jute and pruning of tea are going on. Outturns of cotton and sugarcane are good and those of winter rice and pulses and prospects of mustard are fair to good. Cattle-disease is reported from three districts. The price of common rice is practically stationary.

Serial No.	Districts and subdivisions.	Rainfall at head-quarters stations.	Price of common rice, in seers, per rupee.		Character of the weather, etc.
			This week	Previous week.	
1	2	3	4	5	6

## Report on the Weather and Crops for the week ending the 23rd January 1920.

SUMMARY.—Weather seasonable and favourable. Harvesting of winter rice and plucking of cotton are practically finished. Pressing of sugarcane, harvesting of mustard and pulses, pruning of tea, transplanting of spring rice in Sylhet, ploughing for autumn rice and jute and preparation of land for *jhumming* are in progress. Outturns of winter rice, mustard and pulses are fair to good and of sugarcane and cotton good. Prospects of standing crops are fair. Cattle-disease is reported from three districts. The price of common rice is practically stationary.

Serial No.	Districts and subdivisions.	Rainfall at head-quarters stations.	Price of common rice, in seers, per rupee.		Character of the weather, etc.
			This week.	Previous week.	
1	2	3	4	5	6
1	CACHAR ... (SILOHAR).	Nil	6½	6½	Weather seasonable and favourable. Harvesting of winter rice is completed and of mustard and pulses has commenced. Pressing of sugarcane continues. Outturn of winter rice is fair except in North Cachar Hills.

G. A. WILBY,  
Acting Chief Auditor.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, ASSAM.

FINAL FORECAST OF THE SUGARCANE CROP OF ASSAM  
1919-20.

[NOTE.—On the average of the five years ending 1917-18, the area under sugarcane in Assam represents some 1·5 per cent. of the total area under sugarcane in British India.]

The weather conditions continued to remain favourable since the issue of the first forecast. The rainfall from September to November encouraged growth and a normal outturn is estimated.

The total area under the crop according to the Deputy Commissioners' estimates is 31,300 acres against 33,300 acres (revised) of last year. Sylhet and Lakhimpur are mainly responsible for the decrease owing to discontinuance of *jhum* cultivation.

As estimated by the Deputy Commissioners the outturn for the province comes to 101 per cent. of the normal per acre against 92 (revised) of the previous year. The outturn is reported to be below normal only in Cachar, Goalpara and Nowgong.

On the basis of the normal yield of 18 cwt. of *gur* per acre the total produce of the province is estimated at 569,000 cwt. against 551,400 cwt. (revised) of last year or an increase of 3 per cent.

DATED CAMP GAUHATI :

The 23rd January 1920. }

J. McSWINEY,

Director of Land Records and  
Agriculture, Assam.

## APPENDIX I.

## Final Forecast of the Sugarcane Crop of Assam for 1919-20.

District.	Estimated normal area under sugarcane.	Actual area under sugarcane last year.	Estimated area under sugarcane this year.	Estimated outturn as a percentage of the normal yield per unit of area.		Date by which the harvesting of the crop generally commenced this year and whether that date was early, normal or late.	Remarks by District Officers.
				Last year.	This year.		
1	2	3	4	5	6	7	8
Cachar	Acres. 7,200	Acres. 8,000	Acres. 8,000	80	90	First week of November: early.	Favourable weather and the high price of sugar account for the increase in area. The weather from July to December was generally dry but beneficial to the crop.
Chittagong	7,000	6,500	4,900	100	100	Middle of November: early.	The decrease in area is due to the discontinuance of new cultivation in the hills. The weather has been on the whole favourable.
Goalpara	1,300	1,300	1,300	65	65	1st week of January: normal.	The weather was not favourable early in the season but became so afterwards. The crop was damaged to some extent by floods.
Kamrup	1,500	4,300	4,300	80	100	Middle of January: early.	The weather was unfavourable at the beginning, but improved subsequently. The condition of the crop now appears to be good.

Bamang	...	...	4,700	1,300	1,500	90	100	10th November : early	The weather has been favourable throughout the season.
Koranga	...	...	1,000	2,000	2,000	70	90	First December : early	The weather was dry at the planting season but improved afterwards. The outlook is expected to be below normal.
Shangra	...	...	4,000	5,700	9,000	100	100	First week of December : early	The high price of gum is the cause of the increase in area. The weather has been favourable throughout and the outlook is better than last year.
Lakhimpur	...	...	3,700	5,000	4,000	100	110	10th November : early	The decrease in area as compared with last year is due to abandonment of cultivation by foreign settlers. The weather has been good throughout and the crop is better than last year.
Sadiya Frontier Tract	...	...	200	500	400	100	100	30th November : early	The decrease in area is due to a decrease in the number of sugarcane cultivators, who were mainly Nepalis. The weather has been fair.
Total	...	...	20,700	25,500	31,200	87	101		

\* Revised on the basis of crop abstract.

APPENDIX II.

Abstract statement of estimated acreage and outturn of the Sugarcane Crop of 1919-20 for the reporting districts of Assam.

Agriculture, Assam

# Report on the Weather and Crops for the week ending the 30th January 1920.

**SUMMARY.**—Weather seasonable and favourable. Pressing of sugarcane, harvesting of mustard and pulses, pruning of tea, transplanting of spring rice in Sylhet, ploughing for autumn rice and jute and preparation of land for *jhumming* are in progress. Outturns of sugarcane, mustard and pulses are fair to good and prospects of other crops fair. Cattle-disease is reported from two districts. The price of common rice has risen in Surma Valley.

Serial No.	Districts and subdivisions.	Rainfall at head-quarters stations.	Price of common rice, in seers, per rupee.		Character of the weather, etc.
			This week.	Previous week.

G. A. WILBY,  
Acting Chief Auditor.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, ASSAM.

FINAL FORECAST OF THE COTTON CROP OF ASSAM.  
1919-20.

[NOTE.—On the average of the five years ending 1917-18, the area under cotton crop in Assam represents some 0·2 per cent. of the total area under cotton in India.]

The weather conditions continued to be favourable since the issue of the third forecast and improved the outturn of the cotton crop. The Deputy Commissioner, Garo Hills, has raised his estimate of outturn to 104 per cent. of the normal. The total yield of the clean cotton from an estimated area of 33,000 acres amounts to 14,000 bales against 12,000 bales of previous year.

J. McSWINEY,

DATED CAMP JOBHAT :

The 1st February 1920. }

*Director of Land Records and  
Agriculture, Assam.*

Final Forecast of the Cotton Crop of Assam, 1919-20.

District.	Area, in acres.				Yield in bales of 400 lbs.					Remarks by District Officer.				
	Of current year's crop.	Of previous year's crop.	Average of preceding—	Percentage by which column 2 exceeds (+) or is less than (-) area in—		Estimated yield of current year (i.e., area in column 5).	Estimated yield of previous year (i.e., area in column 6).	Average of preceding—	Percentage by which column 7 exceeds (+) or is less than (-) yield in—					
				Column 2.	Column 4.				Column 8.		Column 9.			
1	2	3	4	5	6	7	8	9	10	11	12			
Bythak	400	600	Five years. 1,100 Ten years. 1,800	—	—65	Five years. —70 Ten years. —76	100	100	200	—	—67	—80	November: normal.	There was absence of seasonal rain at sowing time but owing to sufficient rain in September: to November the growth of the crop was good.
	1,800	700	600	700	+45	+80	+45	200	100	+85	+000	—	15th January: Normal.	The increase in area is due to continued high price of cotton. The weather was wet from August to middle of October and then reasonable up till now. Its effect on the crop is far above. The condition of the crop is the same as last year.

[illegible]

- Revised on the basis of crop abstract.

## Report on the Weather and Crops for the week ending the 6th February 1920.

**SUMMARY.**—Weather generally cloudy : light rain fell in all districts and is beneficial to standing crops. Pressing of sugarcane, harvesting of mustard and pulses, pruning of tea, transplanting of spring rice, ploughing for autumn rice and jute and preparation of land for *jhumming* continue. Outturns of sugarcane, mustard and pulses and prospects of other crops are fair. Cattle-disease is reported from five districts. The price of common rice has risen slightly.

Serial No.	Districts and subdivisions.	Rainfall at head-quarters stations.	Price of common rice, in seers, per rupee.		Character of the weather, etc.
			This week.	Previous week.	
1	2	3	4	5	6
1	CACHAR ... (SILCHAR). Haflong ... Hailakandi ...	2.91 1.29 1.16	6½ 5 6½	6½ 5 6½	Weather rainy and cloudy and beneficial to standing crops. Harvesting of mustard and pulses and pressing of sugarcane are in progress. Ploughing for autumn rice has commenced. Outturn of sugarcane is fair. Cattle-disease is reported from Hailakandi and North Cachar Hills subdivisions.
2	SYLHET ... Sunamganj ... South Sylhet ... Karimganj ... Habiganj ...	2.27 1.18 1.44 2.28 1.99	6½ 5 6 6 7	7 5½ 6 6 7½	Weather rainy and cloudy and favourable to standing crops. Pressing of sugarcane, ploughing for and transplanting of spring rice and pruning of tea continue. Harvesting of mustard has commenced. Prospects of cotton, sugarcane and spring rice are good.
3	KHASI AND JAINTEA HILLS (SHILLONG). Jowai ...	1.66 1.54	5½ 6	5½ 6	Weather cold and windy. Plucking of cotton and ploughing for wet rice fields are going on.
4	NAGA HILLS (KOHIMA). Mokokchung	1.98 1.29	8½ 11	8½ 11	Weather rainy and cloudy. Preparation of land for <i>jhumming</i> , hoeing of terraced fields and sowing of millets continue. Cattle-disease is reported from some villages in the same subdivision.
5	LUSHAI HILLS (AIZAL). Lungleh ...	1.44 Nil	4½ 6	5 6	Outturns and prospects of crops are below normal.
6	GOALPARA (DHUBRI). Goalpara ...	1.62 Nil	5½ 7	5½ 6½	Weather seasonable and favourable to standing crops. Harvesting of mustard and ploughing for autumn rice and jute are in progress. Prospects of crops are fair.
7	KAMRUPE (GAUBATI). Barpeta ...	1.48 1.50	6½ 6	5½ 6	Weather favourable. Harvesting of mustard and ploughing for autumn rice are in progress. Prospects of crops are fair. Cattle-disease is reported from one mauza in Barpeta subdivision.

**SUPPLEMENT TO THE ASSAM GAZETTE, FEBRUARY 11, 1920, 69**

G. A. WILBY,  
Acting Chief Auditor.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, ASSAM.

FINAL FORECAST OF THE WINTER RICE CROP OF ASSAM,  
1919-20.

[NOTE.—On the average of the five years ending 1917-18, the area under winter rice in Assam represents some 4·6 per cent. of the total area in British India.]

The season opened unfavourably but conditions had improved by the beginning of October when the preliminary forecast was issued and continued to be favourable up to the harvest.

The total area under the crop according to the Deputy Commissioners' estimates was 3,158,200 acres against 3,141,900 acres, shown in the second forecast, and 3,395,100 acres, the actual of last year. Since the issue of the second forecast, the figures of four districts have been revised.

The estimate for the province remains unchanged since the second forecast at 93 per cent. of the normal outturn per acre against 73 of the previous year. The crop is estimated to be above normal in Sibsagar and Lakhimpur, normal in Sylhet, and below normal in other districts. Taking 8·5 cwt. as the normal yield of clean rice per acre the total outturn is estimated to be 24,965,600 cwt. or 18 per cent. more than in last year and 2 per cent. higher than the average for the last five years. I consider that this is a conservative estimate.

Camp Nazira,  
The 10th February 1920. }

J. McSWINEY,

Director of Land Records and  
Agriculture, Assam.

## APPENDIX I.

## Final Forecast of the winter rice crop of Assam for 1919-20.

District.	Estimated normal area under winter rice.	Actual area under winter rice last year.	Estimated area under winter rice this year.	Estimated outturn as a percentage of the normal yield per unit of area.		Remarks by Deputy Commissioners.
				Last year.	This year.	
1	2	3	4	5	6	7
Cachar	Acres. 188,000	Acres. 198,700	Acres. 189,000	7	65	Drought at the beginning of the season is the cause of the decrease in area as compared with the actual of last year. In the last part of September there was good rain which improved the crop to some extent. Little rain fell by the end of October and middle of November and benefited the lower varieties. But during the latter part of November and December the weather was dry and hence the decrease in outturn from that of the 2nd forecast.
Sylhet	Acres. 1,775,000	Acres. 1,800,800	Acres. 1,440,500	52	100	The decrease in area as compared with the actual of last year is due to drought at sowing time. The weather improved in September and continued to be beneficial to the crop till the end of the season. There was a bumper crop in the low-lying tracts but below normal on the high land. Taking the two crops together the outturn is estimated to be normal.
Goalpara	Acres. 944,000	Acres. 859,700	Acres. 241,000	63	70	The increase in area as compared with the 2nd forecast of this year is due to revision. The weather was unfavourable at the beginning but became favourable afterwards. The increase in area as compared with the actual of last year is due to high price of rice.

Kamrup	...	...	...	323,000	321,200	321,300	80	75	Want of rain at the early part of the season is the cause of the decrease in both area and outturn. The weather became favourable afterwards.
Dimaas	...	...	...	198,000	215,700	174,500	100	75	The decrease in area and outturn as compared with the actual of last year is due to drought at the beginning.
Kowlong	...	...	...	156,000	175,800	189,800	80	85	Much land could not be sown or planted on account of drought in the early part of the season. The weather improved during the growth of the crop and continued to be favourable towards the end. Insects caused some damage. The decrease in area as compared with the second forecast is due to revision.
Sibsagar	...	...	...	248,000	394,500	346,400	110	120	Dry weather at the beginning was the cause of the decrease in area; it improved afterwards and continued beneficial till the close of the season. The outturn is expected to be above normal.
Lakhimpur	...	...	...	155,000	189,900	164,300	105	102	The decrease in area as compared with the actual of last year is due to want of rain at the time of transplantation. The weather became favourable afterwards. Slight damage by floods has been reported in North Lakhimpur sub-division.
Garo Hills (Plains)	...	...	...	55,000	21,900	25,000	80	80	The weather was not favourable on account of insufficient rain at sowing and transplanting time. Hence the decrease in both area and outturn.
Other districts	...	...	...	75,900	75,900	75,000	...	...	
Total	...	...	...	2,441,900	3,296,100	2,125,200	73	95	

## APPENDIX II.

Abstract Statement of estimated acreage and outturn of the winter rice crop of Assam for 1919-20.

Province.	Acreage.						Outturn (in cwt.).			
	Of current year's crop.	Of previous year's crop.	Average of preceding—		Percentage by which column 2 exceeds (+) or is less than (—) area in		Estimated yield of current year's (i.e. of area in column 5). C. N. SARMA,

Personal Assistant

to Director, Department of Land Records and Agriculture, Assam.

## Report on the Weather and Crops for the week ending the 13th February 1920.

SUMMARY.—Weather generally cloudy and favourable for standing crops: slight rain fell in most districts. Harvesting of pulses is nearly finished and that of mustard, pressing of sugarcane, pruning of tea, transplanting of spring rice, ploughing for autumn rice and jute and preparation of land for *jhumming* continue. Outturns of sugarcane, mustard and pulses and prospects of other crops are generally fair. Cattle-disease is reported from six districts. The price of common rice continues to rise.

Serial No.	Districts and subdivisions.	Rainfall at head-quarters stations.	Price of common rice, in seers, per rupee.		Character of the weather, etc.
			This week.	Previous week.	
1	2	3	4	5	6
1	CACHAR (SILOHAR).	·22	5½	6½	Weather cloudy and windy and somewhat harmful to harvesting of mustard and pulses which is in progress. Pressing of sugarcane continues. Outturn of sugarcane is fair. Cattle-disease is reported from some places in Hailakandi and North Cachar Hills subdivisions.
	Hailakandi	·48	5	5	
	Hailakandi	·82	6	6½	
2	SYLHET ...	·17	6	6½	Weather seasonable and favourable to standing crops. Pressing of sugarcane, harvesting of mustard, ploughing for and transplanting of spring rice and pruning of tea continue. Prospects of cotton, sugarcane and spring rice are good, but of tea and mustard not good.
	Sunamganj ...	1·07	5	5	
	South Sylhet	·70	5½	6	
	Karimganj ...	1·42	5½	6	
	Holiganj ...	·59	6½	7	
3	KHASI AND JAINTHIA HILLS (SHILLONG).	·08	5½	5½	Weather seasonable. Plucking of cotton, preparation of land for summer crops and ploughing for wet rice fields are in progress.
	Jowai	Nil	6	6	
4	NAGA HILLS (KOHIMA).	·89	8½	8½	Weather cold and cloudy. Preparation of land for <i>jhumming</i> continues. Sowing of jobsteers has commenced. Cattle-disease is reported from some villages in the sadr subdivision.
	Mokokchung	·74	11	11	
5	LUSHAI HILLS (AIZAL).	2·31	4	4½	Outturns and prospects of crops are below normal.
	Lungleh	1·75	6	6	
6	GOALPARA (DHUBRI).	Nil	5½	5½	Weather cold and favourable to standing crops. Harvesting of mustard is nearly finished. Ploughing for autumn rice and jute continues. Prospects of crops are fair. Cattle-disease is reported from one mauza.
	Goalpara	·82	7	7	
7	KAMRU (GAUHATI).	Nil	6	6½	Weather favourable. Harvesting of mustard is nearly finished. Ploughing for autumn rice continues. Prospects of crops are fair. Cattle-disease is reported from one mauza in Barpeta subdivision.
	Barpeta	Nil	6	6	

## Report on the Weather and Crops for the week ending the 13th February 1920—concluded.

Serial No.	Districts and subdivisions.	Rain-fall at head-quarters stations.	Price of common rice, in seers, per rupee.		Character of the weather etc.
			This week.	Previous week.	
1	2	3	4	5	6
8	DARRANG (TEA-PUR).	Nil	6	6	Weather cold and cloudy and favourable for standing crops. Pressing of sugarcane, harvesting of mustard, ploughing for autumn rice and sugarcane, and pruning of tea are in progress.
	Mangaldai ...	Nil	6	6½	
9	Nowgong ...	Nil	5	6	Weather very cold and favourable for standing crops. Rain is wanted for tea cultivation. Harvesting of pulses is nearly finished. Harvesting of mustard, pressing of sugarcane, hoeing and pruning of tea and ploughing for autumn and winter rice continue. Outturn of mustard is fair and that of sugarcane and prospects of other standing crops are good. Cattle-disease is reported from places.
10	SIBSAGAR (JORHAT).	31	6	6	Weather reasonable and favourable for standing crops. Prospects of crops are fair.
	Sibsagar ...	21	6	6½	
	Golaghat ...	57	5½	6	
11	LAKHIMPUR (DIBRUGARH).	65	5½	5½	Weather seasonable and favourable. Pressing of sugarcane, harvesting of mustard, pruning of tea and ploughing for and sowing of autumn rice are in progress. Prospects of crops are fair. Cattle-disease is reported from places.
	North Lakhimpur.	124	8	8	
12	SADIYA FRONTIER TRACT (SADIYA).	77	4½	4½	Weather and prospects of crops are good.
	Paraghat ...	569	5	5	
13	GARO HILLS	13	4	5	Weather cloudy. Harvesting of mustard and ploughing for autumn rice and jute continue. Outturn of mustard is fair.

## Report on the Weather and Crops for the week ending the 20th February 1920.

**SUMMARY.**—Weather seasonable. Harvesting of mustard and pulses is nearly finished. Pressing of sugarcane, pruning of tea, transplanting of spring rice, ploughing for autumn rice and jute and preparation of land for *jhumming* continue. Outturns and prospects of crops are generally fair. Cattle-disease is reported from five districts. The price of common rice continues to rise slightly.

Serial No.	Districts and subdivisions.	Rainfall at head-quarters stations.	Price of common rice, in seers, per rupee.		Character of the weather, etc.
			This week.	Previous week.	
1	2	3	4	5	6
1	CACHAR ... (SILCHAR).	·08	5½	5½	Weather seasonable. Harvesting of mustard and pulses is nearly finished. Pressing of sugarcane continues. Outturn of mustard is fair and of pulses poor. Cattle-disease is reported from some places in Hailakandi and North Cachar Hills subdivisions.
	Hailong ...	Nil	5	5	
	Hailakandi ...	·14	5½	6	
2	SYLHET ...	·02	6	6	Weather seasonable and favourable to standing crops. Harvesting of mustard and pulses is nearly finished. Pressing of sugarcane, transplanting of spring rice and pruning of tea continue. Ploughing for autumn and winter rice has commenced. Outturns of mustard and pulses are fair and of sugarcane and prospects of other crops except tea good.
	Sunamganj ...	·50	5	5

Shillong,  
The 27th February 1920.

L. B. WARD,  
Deputy Comptroller, Assam.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, ASSAM.

FINAL FORECAST OF THE RAPE AND MUSTARD CROPS OF ASSAM, 1919-20.

[NOTE.—On the average of the five years ending 1917-18, the area under rape and mustard crops in Assam represents some 4·4 per cent. of the total area under the crops in British India.]

From the issue of the preliminary forecast to the harvest there was no rain, the want of which affected growth in Goalpara, Kamrup and Garo Hills.

The area under rape and mustard according to the Deputy Commissioners' estimates is 289,700 acres against 286,400 acres (revised) of last year : the increase is mainly due to high prices. The areas reported in the preliminary forecast have been raised in Cachar, Kamrup, Nowgong, Sibsagar and Lakhimpur, and reduced in Sadiya Frontier Tract and Garo Hills.

As estimated by the Deputy Commissioners the percentage outturn for the province is calculated to be 87 of the normal per unit of area or 10 per cent. more than in previous year. Taking 4½ cwt. as the normal yield per acre, the total produce of the province amounts to 56,700 tons or 14 per cent. more than in last year.

CAMP DIBRUGARH :

*The 25th February 1920.*

J. McSWINEY,

*Director of Land Records and  
Agriculture, Assam.*

APPENDIX I.

Final Forecast of the Rape and Mustard Crops of Assam, 1919-20.

District.	Estimated normal area under rape and mustard crops.	Actual area under rape and mustard crops last year.	Estimated area under rape and mustard crops this year.	Estimated outturn as a percentage of the normal yield per unit of area.		Date by which the harvesting of the crops began this year and whether that date was early, normal or late.	Remarks by District Officers.
				Last year.	This year.		
1	2	3	4	5	6	7	8
Cachar	10,000 Acres.	8,000 Acres.	12,000 Acres.	70	95	Second week of January: normal.	The rainfall in November lengthened the period of sowing the crop. The high price of mustard oil also tended to increase the area sown. The weather in December and January was favourable. But the crop sown before the rainfall of November was damaged by it and hence the outturn is below normal.
Sylhet	52,000 Acres.	40,000 Acres.	40,000 Acres.	70	80	Beginning of February: normal.	The weather during the season was fairly favourable except that there was no rain in December and January.
Goalpara	53,400 Acres.	63,000 Acres.	60,500 Acres.	70	75	1st week of January: normal.	The increase as compared with the actual of last year is due to high price of mustard. The outturn is below normal owing to want of timely rainfall.
Kamrup	67,000 Acres.	63,500 Acres.	66,000 Acres.	90	75	10th January: normal.	The area reported in the preliminary forecast have been revised. The rainfall at the beginning retarded ploughing and hence the decrease in area as compared with last year. The weather was unfavourable during the growth of the crop and some damage was done by drought and insects.

## APPENDIX I.

District.	Estimated normal area under rapeseed and mustard crops.	Actual area under rapeseed and mustard crops last year.	Estimated area under rapeseed and mustard crops this year.	Estimated outturn as a percentage of the normal yield per unit of area.		Date by which the harvesting of the crops began this year and whether that date was early, normal or late.	Remarks by District Officers.
				Last year.	This year.		
1	2	3	4	5	6	7	8
Burmes	21,320 Acres.	22,500 Acres.	24,900 Acres.	94	100	Middle of January: normal	The failure of the autumn rice crop and the favourable weather account for the increase in area and fall outturn.
Nowgong	46,400	56,000	41,000	88	95	Ditto	The increase in area is due to expansion of cultivation chiefly by foreign settlers. The outturn is estimated to be slightly below normal on account of insufficient rain in December and January.
Sibsagar	36,100	31,300	29,800	96	113	Last week of January: normal	The area is less than last year owing to unfavourable weather at the beginning.
Lakhimpur	15,000	7,500	11,100	75	100	15th March: late	The weather was subsequently favourable. Slight damage was done by rain in the Mayali.
Sadiya Frontier Tract	500	500	300	96	98	15th February: late	The increase in area as compared with the actual of last year is attributable to the high price of mustard seed. The weather was favourable during the season, but slight damage was done by hail in North Lakhimpur.
Garohills (phais)	4,500	6,100	6,200	80	70	31st January: normal	The character of weather was fair.
Total	104,100	105,400	108,700	77	87		The increase in area is due to high price of mustard last year. The weather was favourable at growing time but not so favourable in January on account of want of rain.

\* On the basis of crop abstracts.

APPENDIX II.  
Abstract Statement of estimated Acreage and Outturn of the Rape and Mustard Crops of Assam for the year 1919-20.

### Report on the Weather and Crops for the week ending the 27th February 1920.

**SUMMARY.**—Weather seasonable. Harvesting of mustard and pulses is almost finished. Pressing of sugarcane, pruning of tea, transplanting of spring rice, ploughing for autumn and winter rice and jute and preparation of land for *jhumming* continue. Harvesting of tobacco and sowing of autumn rice and jute have commenced. Outturns and prospects of crops are generally fair. Cattle-disease is reported from five districts. The price of common rice is practically stationary.

Serial No.	Districts and subdivisions.	Rainfall at head-quarters stations.	Price of common rice, in seers, per rupee.		Character of the weather, etc.
			This week	Previous week.

CHANDRA NATH SARMA,

for Director of Land Records and Agriculture, Assam.

### Report on the Weather and Crops for the week ending the 12th March 1920.

**SUMMARY.**—Weather generally rainy and favourable to agricultural operations: heavy rain and hailstorms have somewhat damaged the standing crops and interfered with ploughing in some districts of the Assam Valley. Ploughing of land for rice and jute, pressing of sugarcane, pruning of tea and preparation of land for *jhumming* in the hills continue. Prospects and outturns of mustard and pulses are fair to good. Sowing of autumn rice and jute has commenced in places. Cattle-disease is reported from three districts. The price of common rice is stationary.

Serial No.	Districts and subdivisions.	Rainfall at head-quarters stations.	Price of common rice, in seers, per rupee.		Character of the weather, etc.
			This week	Previous week.	
1	2	3	4	5	6
1	CACHAR ... (SILCHAR). Haflong ... Hailakandi ...	2.66 3.45 2.56	5½ 5 6½	5½ 5 6½	Weather cloudy and windy: ploughing land for early rice continues. Cattle-disease is reported from Hailakandi and North Cachar Hills subdivisions.
2	SYLHET ... Sunamganj ... South Sylhet. Karimganj ... Habiganj ...	2.08 2.90 2.55 4.26 2.56	6½ 5½ 5½ 5½ 6½	6 5½ 6 5½ 6	Weather rainy and favourable for ploughing. Harvesting of mustard is finished and outturn is fair. Pressing of sugarcane, pruning of tea and ploughing for autumn and winter rice and jute continues. Prospects and outturns of crops are generally fair.
3	KHASI AND JAINTHIA HILLS (SHILLONG). Jowai ...	.04 Nil	4½ 5½	4½ 6	Weather seasonable and favourable. Plucking of cotton and preparation of wet rice fields is in progress.
4	NAGA HILLS (KOHIMA). Mokokchung	.71 2.27	8 10	8½ 10	Weather cloudy with little rain at intervals. Sowing of millets is finished. Clearing of <i>jhum</i> fields is going on and sowing of jobsteers continue.
5	LUSHAI HILLS (AIZAL). Lungleh ...	4.88 2.54	4½ ...	3½ 6	Weather rainy. <i>Jhum</i> cutting is nearly finished. Outturns and prospects of crops are below normal.
6	GOALPARA (DHUBRI). Goalpara ...	.18 .14	5½ 6	5½ 6	Weather seasonable and favourable to standing crops. Ploughing for jute and autumn rice continues and sowing has also commenced in places. Prospects of crops are good.
7	KAMRUPE (GAU- HATI). Barpeta ...	.75 2.00	5½ 6	5½ 5	The standing crops have partly been damaged by the hailstorms. Ploughing of land for autumn rice is going on. Outturn of mustard is good.

## Report on the Weather and Crops for the week ending the 12th March 1920—concluded.

Serial No.	Districts and subdivisions.	Rainfall at head-quarters stations.	Price of common rice, in seers, per rupee.		Character of the weather, etc.
			This week.	Previous week.	
1	2	3	4	5	6
8	DARRANG (TEZ-PUR).	3.02	5½	5½	Weather rainy and not favourable for pressing of sugarcane, harvesting of mustard, ploughing for autumn and winter rice, sugarcane and jute and pruning of tea on account of heavy showers and hailstorms.
	Mangaldai ...	6.62	6	6½	
9	NEWSONG ...	1.45	4½	4½	Weather rainy and favourable for ploughing for autumn rice, winter rice seedlings and jute. Pressing of sugarcane in progress. Prospects of pulses and other standing crops are good. Cattle-disease is reported from places.
10	SIBSAGAR (JORHAT).	2.00	5½	5½	Weather rainy and not favourable for autumn rice cultivation. Pressing of sugarcane is in progress.
	Sibsagar ...	1.19	6	0	
	Golaghat ...	.85	5½	5½	
11	LAKHIMPUR (DIBRUGARH).	4.62	5	5½	Weather seasonable and not favourable for standing crops. Pressing of sugarcane, harvesting of mustard and sowing of autumn rice have been retarded by heavy rains. Outturn of mustard and sugarcane fair. Cattle-disease is reported from two mauzas in sadar subdivision.
	North Lakhimpur.	4.49	6	7	
12	SADIYA FRONTIER TRACT (SADIYA).	2.47	5	5	Weather rainy. Prospects of crops are good.
	Pasighat ...	7.28	5	5	
13	GARO HILLS	.06	5	5½	Weather seasonable. Ploughing for autumn rice and jute continues and sowing is going on.
14	MANIPUR ...	2.95	16	16	.....

J. McSWINEY,

*Director of Land Records and Agriculture, Assam.*

Report on the Weather and Crops for the week ending the 19th March 1920:

**SUMMARY** — Weather generally seasonable and favourable to agricultural operations. Ploughing for rice and jute, pressing of sugarcane, pruning of tea and harvesting of mustard in progress. Sowing of autumn rice and jute has commenced. Prospects and outturns of crops are fair to good. Cattle-disease is reported from three districts. The price of common rice is practically stationary.

Serial No.	Districts and subdivisions.	Rainfall at head-quarters stations.	Price of common rice, in seers, per rupee.		Character of the weather, etc.
			This week.	Previous week.	
1	2	3	4	5	6
1	CACHAR (SILCHAR).	2.92	5½	5½	Weather seasonable: ploughing land for early rice continues. Cattle-disease is reported from Hailakandi.
	Hailong ..	8.06	5	5	
	Hailakandi ..	2.92	6½	6½	
2	SYLHET ....	1.71	6½	6½	Weather seasonable. Pressing of sugarcane and pruning of tea are nearly finished. Ploughing for autumn and winter rice and jute continues. Prospects and outturns of crops are generally fair.
	Sonamganj ..	1.98	5½	5½	
	South Sylhet ..	1.13	5½	5½	
	Karimganj ..	3.40	5	5½	
	Habiganj ..	.78	6½	6½	
3	KHASI AND JAINTIA HILLS (SHILLONG).	.14	4½	4½	Weather seasonable and favourable. Plucking of cotton and preparation of wet rice fields are in progress.
	Jowai ...	Nil	5	5½	
4	NAGA HILLS (KOHIMA).	.71	8	8	Weather seasonable. sowing of jobsteers continues and sowing paddy in <i>ghums</i> commenced.
	Mokokchung ..	2.25	11	10	
5	LUSHAH HILLS (AIZAL).	2.44	4	4½	Weather fair. Outturns and prospects of crops are below normal.
	Lungleh ..	8.09	...	...	
6	GOALPARA (DHUBRI).	.89	5½	5½	Weather favourable to standing crops. Ploughing for jute and autumn rice continues and sowing is going on. Prospects of crops are good.
	Goalpara ...	.8	6	6

### Report on the Weather and Crops for the week ending the 26th March 1920.

**SUMMARY.**—Weather rainy and generally favourable to agricultural operations, but delaying sowing. Ploughing for rice and jute, pressing of sugarcane, and harvesting of mustard and *matikalai* are in progress. Prospects and outturns of crops are good. Cattle-disease is reported from five districts. The price of common rice is practically stationary in the Assam Valley and has fallen slightly in Surma Valley.

Serial No.	Districts and subdivisions.	Rainfall at head-quarters stations.	Price of common rice, in seers, per rupee.		Character of the weather, etc.
			This week	Previous week.	
1	2	3	4	5	6
1	CACHAR ... (SILCHAR).	1.17	6	5½	Weather seasonable: ploughing land for early rice continues. Cattle-disease is reported from Hailakandi and Haflong subdivisions.
	Haflong ...	.00	5½	5	
	Hailakandi ...	1.03	6½	6½	
2	SYLHET ...	1.00	7	6½	Weather seasonable. Pressing of sugarcane and pruning of tea are finished. Ploughing for autumn and winter rice and jute continues. Prospects and outturns of crops are generally fair.

## Report on the Weather and Crops for the week ending the 23rd April 1920.

SUMMARY.—Weather generally seasonable. Pressing of sugarcane, sowing of *jhum* crop, ploughing for and sowing of autumn and winter rice and jute and tea manufacture are in progress. Harvesting of spring rice has commenced with fair outturn. Prospects of crops are fair to good. Cattle-disease is reported from five districts. The price of common rice is practically stationary.

Serial No.	Districts and subdivisions.	Rainfall at head-quarters stations.	Price of common rice, in <i>seers</i> , per rupee.		Character of the weather, etc.
			This week	Previous week.	
1	2	3	4	5	6
1	CACHAR (SILCHAR).	2.09	6	6	Weather seasonable. Ploughing land for early rice continues but more rain is wanted. Cattle-disease is reported from Hailakandi and Hailakandi subdivisions.
	Hailakandi	1.79	5½	5½	
	Hailakandi	2.21	7	7	
2	SYLHET ...	1.84	6	6	Weather seasonable. Ploughing for and sowing of autumn and winter rice and jute continues. Harvesting of spring rice has commenced with fair outturn. Prospects of crops are fair.
	Sunamganj	1.64	6	5½	
	Sonth. Sylhet	2.40	6	6	
	Karimganj	Nil	5½	6	
	Holiganj	1.85	6½	6½	
3	KHASI AND JAINTEA HILLS (SHILLONG)	2.10	4½	4½	Weather seasonable and favourable. Ploughing for wet rice and other crops continues. Prospects of crops are favourable.
	Jowai	2.21	5	5	
4	NAGA HILLS (KOHIMA).	1.99	8	§	Weather seasonable. Cattle-disease is reported from one village in each.
	Mokokchung	1.81	10	§	
5	LUDHAI HILLS (AJAI).	Nil	4	4	Weather dry and hot. <i>Jhum</i> burning is finished. Sowing of millet and maize is in progress.
	Lungleh	Nil	†	†	
6	GOALPARA (DHUBRI).	3.62	5½	5½	Weather stormy. Sowing of jute and autumn and broadcast winter rice continues. Prospects of crops are good. Cattle-disease is reported from Goalpara subdivision.
	Goalpara	2.48	6	6	
7	KAMRUPTI (GUWATI).	1.88	6½	6	Weather favourable. Ploughing for autumn and broadcast winter rice continues. Prospects of crops are fair. Cattle-disease is reported from one mauza.
	Barpeta	1.99	6	6	

§ Report not received.

† Rice not sold.

## Report on the Weather and Crops for the week ending the 23rd April 1920—concluded.

No.	Districts and subdivisions.	Rainfall at head-quarters stations.	Price of common rice, in seers, per rupee.		Character of the weather, etc.
			This week.	Previous week.	
	2	3	4	5	6
8	DAKSHIN (TERRACE).	67	5½	6	Weather cloudy and winly and not favourable for ploughing for and sowing of autumn and broadcast winter rice and jute. Pressing of sugarcane and plucking of tea continue.
	Mangalmai ...	8.79	6½	7½	
9	Nowanong ...	2.26	5½	5½	Weather reasonable and favourable for ploughing for autumn and winter rice and jute and transplantation of sugarcane. Sowing of autumn and winter rice is going on but somewhat retarded by rains. Pressing of sugarcane and harvesting of pulse is nearly finished.
10	SIBSAGAR (JORNAT).	1.53	6	6	Weather reasonable. Ploughing for rice seedlings has commenced. Plucking of tea and pressing of sugarcane are in progress. Prospects of autumn rice crops are good.
	Sibsagar ...	2.27	6½	6	
	Golaghat ...	1.27	6	6	
11	LAKHIMPUR (DIBRUGARH).	1.97	5½	5½	Weather reasonable. Ploughing for autumn and broadcast winter rice and pressing of sugarcane are in progress. Prospects of crops are fair. Cattle-disease is reported from one mauza in Sadar.
	North Lakhimpur.	1.33	6	6	
12	SADIYA FRONTIER TRACT (SADIYA).	3.22	5	5	Weather rainy. Prospects of crops are good.
	Paighat ...	1.81	5	5	
13	GAHO HILLS	1.97	5½	5½	Weather hot and winly. Ploughing land for and sowing of autumn and broadcast winter rice, jute and jhum cultivation continue. Slight damage by hail is reported.

Surma Valley and Hill Districts.

Assam Valley Division.

J. McSWINEY,

Director, Department of Land Records and Agriculture, Assam.

## Report on the Weather and Crops for the week ending the 18th June 1920.

SUMMARY.—Weather seasonable but more rain is wanted in the Upper Assam Valley. Plucking of tea and cultivation of winter rice continue. Prospects of crops are fair. Cattle-disease is reported from seven districts. The price of common rice continues to rise slightly.

Serial No.	Districts and subdivisions.	Rainfall at head-quarters stations.	Price of common rice, in seers, per rupee.		Character of the weather, etc.
			This week	Previous week.	
1	2	3	4	5	6
1	CACHAR ... (SILCHAR).	5.72	4½	4½	Weather seasonable: more rain is wanted. Cultivation of winter rice is in progress. Prospects of paddy crops are not hopeful. Cattle-disease is reported from places. [Received late].
	Hailong ...	6.20	5	5	
	Hailakandi ...	2.50	5	5	
2	SYLHET ...	9.26	4½	4½	Weather seasonable. Sowing of autumn and winter rice and jute, transplantation of winter rice and plucking of tea continue. Prospects of crops are generally fair.
	Sunamganj ...	11.86	5½	5½	
	South Sylhet ...	1.80	4	5	
	Karimganj ...	6.06	4½	4½	
	Haliganj ...	8.94	5	4½	
3	KHASI AND JAINTEA HILLS (SHILLONG).	5.06	4 <sup>0</sup> / <sub>10</sub>	4 <sup>0</sup> / <sub>10</sub>	Weather seasonable. Harvesting of potatoes and sowing of paddy are in progress. Prospects of potatoes are poor.
	Jowai ...	3.07	5	5	
4	NAGA HILLS (KOHIMA).	3.22	7	7	Weather seasonable. Transplanting of paddy is going on. Cattle-disease is reported from places.
	Mokokchung ...	3.07	10	10	
5	JURAI HILLS (AIZAL).	2.09	4	4	Weather seasonable: more rain is still wanted for maize.
	Lungleh ...	2.42	†	†	
6	GOALPARA (DHUBRI).	15.44	4½	5	Weather rainy and favourable for crops. Cultivation of transplanted winter rice continues. Prospects of crops are fair. Cattle-disease is reported from Goalpara subdivision.
	Goalpara ...	1.49	5½	5½	
7	KAMRU (GAUBATI).	2.34	5½	5	Weather seasonable and favourable to crops. Sowing of autumn rice is finished. Transplanting of winter rice is in progress. Prospects of crops are fair. Cattle-disease is reported from one mauza.
	Barpeta ...	3.35	5	5	

† Rice not sold.

**Report on the Weather and Crops for the week ending the 18th June 1920—concluded.**

SHILLONG:

The 5th July 1920.

J. McSWINEY,

Director of Land Records and Agriculture, Assam.

## FINANCIAL DEPARTMENT.

*The 6th July 1920.*

No. 6020F.—The following notifications by the Government of India, Finance Department, are republished for general information :—

GOVERNMENT OF INDIA.

FINANCE DEPARTMENT.

NOTIFICATION.

ACCOUNTS AND FINANCE.  
Public Debt.

*Simla, the 19th June 1920.*

No. 1732-F.—With reference to the Notification in the Finance Department No. 1537-F., dated the 12nd June 1920, it is notified for public information that the sale of treasury bills will be discontinued with effect from Monday the 21st June 1920.

No. 1691-F.

*Simla, the 21st June 1920.*

Subscriptions (a) for ten year 6 per cent Bonds, 1930, free of income-tax, and (b) for the 5 per cent income-tax free Loan, 1945-55, will be received without limit of amount from 5th July to 14th August 1920 inclusive. Subscriptions to both issues in the form of War Bonds will however be received up to 15th October 1920.

### I.—TEN YEAR SIX PER CENT BONDS, 1930, INCOME-TAX FREE.

2. DATE OF REPAYMENT.—The Government of India undertake to repay the Bonds at par on 15th August 1930.

3. ISSUE PRICE.—The issue price will be Rs. 100 for every Rs. 100 of the Bonds applied for.

4. INTEREST.—Payable half-yearly at the rate of 6 per cent per annum on 15th February and 15th August.

Advance interest from date of purchase to 14th August 1920 will be paid at the time of issue of securities.

Interest on the Bonds will be income-tax free throughout their currency, but will be taken into account in determining the rate at which the tax will be levied on other income, and will be liable to super-tax.

5. ISSUE OF TEN YEAR BONDS IN EXCHANGE FOR WAR BONDS.—War Bonds 1920 and 1921 will be accepted at par as the equivalent of cash in subscription to the Bonds up to 15th October inclusive.

(a) (i) War Bonds, 1920, if tendered before 15th August 1920, will carry interest at 6 per cent from that date.

Advance interest at 5½ per cent to date of tender and at 6 per cent from that date to 14th August will be paid at the time of issue of securities.

(2) War Bonds, 1920, if tendered after 15th August 1920, will carry interest at 6 per cent from that date.

(b) War Bonds, 1921, will carry interest at 6 per cent from date of tender :—

(1) If tendered before 15th August 1920, advance interest at 5½ per cent up to date of tender and at 6 per cent from date of tender up to 14th August will be paid at the time of issue of securities.

(2) If tendered after 15th August 1920, advance interest at 5½ per cent up to date of tender and at 6 per cent up to 14th February 1921 will be paid at the time of issue of securities.

Interest will cease from 15th August 1920 on War Bonds, 1920, not tendered for conversion.

## II.—5 PER CENT INCOME-TAX FREE LOAN.

Issued at a discount of 5 per cent and

Repayable at par not earlier than 1945 and not later than 1955.

6. DATE OF REPAYMENT.—If not previously repaid, the loan will be repaid at par on 15th October 1955 : but the Government of India reserve to themselves the right to repay the loan or any part of it at par on or after 15th October 1945 on giving three calendar months' notice in the *Gazette of India*.

7. ISSUE PRICE.—The price of this year's issue will be Rs. 95 for every Rs. 100 of the loan applied for.

8. INTEREST.—Payable half-yearly at the rate of 5 per cent per annum on 15th April and 15th October.

Advance interest from date of purchase to 14th October will be paid at the time of issue of securities.

Interest on the loan will be income-tax free throughout its currency, but will be taken into account in determining the rate at which the tax will be levied on other income, and will be liable to super-tax.

9. ISSUE OF LOAN IN EXCHANGE FOR WAR BONDS.—War Bonds, 1920, 1921, 1922 and 1923, will be accepted at par as the equivalent of cash in subscription to the loan up to 15th October inclusive. War Bonds 1925 and 1928 will be accepted up to the same date at their nominal value increased by the present value of the premium payable on maturity; that is, they will be accepted as the equivalent of Rs. 102-4-0 and Rs. 103-4-0 respectively for every Rs. 100 nominal value of 1925 and 1928 Bonds presented.

Advance interest will be paid at the time of issue of securities from date of tender up to 14th October at 5 per cent, in addition to the half-yearly interest due on 15th August in the case of 1920 and 1922 War Bonds and on 15th September in the case of 1921, 1923, 1925 and 1928 War Bonds.

Interest will cease from 15th August 1920 on War Bonds, 1920, not tendered for conversion.

10. DEPRECIATION FUND.—In accordance with the undertaking announced in the Government of India Finance Department Notification No. 1457-F., dated 16th June 1919, a sum equal to 1½ per cent of the aggregate amount of the loan inclusive of the 1919 issue will be set aside annually to form a fund to be used for its purchase and cancellation when the market value falls below the issue price. No future issues will be made at a price below 95 per cent; and should the issue price be higher, the fund will be employed for the purchase and cancellation of the loan when the market price falls below such higher issue price.

### Supplementary Provisions.

Form of securities.

11. The loan and Bonds will be issued in the form of—

- (a) Stock, the purchasers of which will be given Stock Certificates, or
- (b) Promissory Notes.

These will subsequently, if desired, be exchanged, free of cost, for bearer bonds when the latter are available.

If no preference is stated by the purchaser, the securities will be issued in the form of Promissory Notes. A single Promissory Note will be issued for the amount required.

Purchase of loan in the form of Promissory Notes at Banks and Government Offices.

12. The loan and Bonds in the form of Promissory Notes in denominations of Rs. 100 or multiples thereof can be purchased on payment of the amount due :—

- (a) Without formal application, at the head offices or any Indian branch of the Banks of Bengal, Bombay and Madras, and
- (b) On application, at the office of the Controller of Currency, Calcutta, Deputy Controller of Currency, Bombay, or of the Accountant General or Comptroller at other provincial capitals or at any Government treasury or sub-treasury.

Applications may be in the form attached hereto (Form A), or in any other form which states clearly the amount and description of the securities required, the full name and address of the purchaser, and the treasury at which he desires that interest shall be paid.

13. Stock can be purchased in denominations of Rs. 100 or multiples thereof on payment of the amount due, from the Public Debt Office, Calcutta, direct or through any of the following offices :—

- (a) Office of the Controller of Currency, Calcutta, Deputy Controller of Currency, Bombay, or of the Accountant General or Comptroller at other provincial capitals ;
- (b) The head offices or any Indian branch of the Banks of Bengal, Bombay and Madras,
- (c) Any Government treasury or sub-treasury.

Applications may be in the form attached hereto (Form A), or in any other form which states clearly the amount and description of securities required, the full name and address of the applicant, and the treasury at which he desires that interest shall be paid.

14. The loan and Bonds in the form of Stock or Promissory Notes can be purchased in denominations of Rs. 100 or multiples thereof, subject to a maximum of Rs. 10,000, from 5th July to 14th August inclusive, on payment of the amount due and on application at any post office conducting savings bank business. Applications may be in the form attached hereto (Form B) or in any other form which states clearly the amount and description of securities required, the full name and address of the applicant, and the treasury at which he desires that interest shall be paid.

Securities purchased through the Post Office may, if so desired, be left in the custody of the Accountant General, Posts and Telegraphs.

Safe custody receipts for War Bonds deposited with the Accountant General, Posts and Telegraphs, will be received as the equivalent of cash, from 5th July to 15th October inclusive, at the values prescribed in clauses 5 and 9 at any post office conducting savings bank business.

15. Payment may be made either in cash or by cheque. In the case of purchases of securities at Presidency Banks the cheques should be drawn in favour of the Secretary and Treasurer or Agent of the Presidency Bank according as the purchase is made at the head office or at a branch of the Presidency Bank. In the case of purchases made at a Government office or a Post Office, the cheque should be drawn in favour of the officer to whom the application is presented.

Payment may also be made by tender of War Bonds at the values prescribed in clauses 5 and 9. If the value of the War Bonds tendered does not correspond exactly to the price payable for the amount of loan and Bonds applied for, it will be at the option of the tenderer either to pay in cash the further amount required to make up an exact multiple of Rs. 100 in the loan and Bonds or to have the broken amount refunded to him in cash.

*Example.*—An applicant tenders Rs. 500 of War Bonds 1928 in subscription to the 5 per cent loan. The issue price of Rs. 500 face value of the loan will be Rs. 475, and of Rs. 600 of the loan will be Rs. 570; while the War Bonds will be accepted as the equivalent of Rs. 516-4-0. The applicant can either obtain Rs. 600 face value of the loan on payment of Rs. 53-12-0 in cash in addition to the War Bonds tendered or may at his option obtain Rs. 500 face value of the loan and receive a refund of Rs. 41-4-0 in cash.

Applicants who tender War Bonds in payment must transfer such Bonds to Government, (a) in the case of Promissory Notes by endorsing these with the words "Pay to the Governor General in Council" over their signature, and (b) in the case of stock, by signing the form of transfer deed on the back of the Stock Certificate before a witness. In the case of Bearer Bonds no writing is necessary.

Payment at head offices of the Presidency Banks may also be made in Indian Treasury Bills which will be accepted as cash at their face value less a discount calculated at the rate of 4 per cent per annum on the unexpired portion of the currency of the Bill.

Payment at post offices may also be made by the withdrawal of sums at the credit of the applicant in the Post Office savings banks.

16. Brokerage will be paid to recognized bankers and brokers on applications for the loan or Bonds bearing their stamp. The rate will be  $\frac{1}{16}$ th per cent when payment is made in the form of Treasury Bills and  $\frac{1}{8}$ th per cent in other cases.

By order of the Governor-General in Council,

M. M. S. GUBBAY,

Secretary to the Government of India

## DEPARTMENT OF LAND RECORDS AND AGRICULTURE, ASSAM.

## PRELIMINARY FORECAST OF JUTE CROP IN ASSAM, 1920.

[NOTE.—On the average of the five years ending 1918, the area under jute in Assam represents some 3·2 per cent. of the total area under jute in British India.]

*Character of the season.*—The rainfall in February was above the average except in the lower Assam Valley where it was nearly normal. It was excessive everywhere in March, when it was more than double the average in the principal jute growing districts. In April the rain was scanty in the Surma Valley and about normal in the Assam Valley, but in May it was in defect almost in all districts. The excessive rain at sowing time tended to diminish the area that would have been put under jute, particularly in Sylhet, Goalpara and Kamrup. Though the weather has changed for the better, the general condition of the crop has not improved and is everywhere reported to be worse than in last year.

*Area sown.*—According to the estimates of the Deputy Commissioners the area sown this year has decreased in every district except Nowgong, where there is a slight increase owing to immigration from Mymensingh. The total area under the crop is estimated at 125,100 acres which is 12,200 acres less than the actual area of last year. Unfavourable market results then as well as the unfavourable weather are responsible for the decrease.

*Stock.*—According to the report of the Deputy Commissioners there is much jute in stock from last year in Sylhet, Goalpara and Nowgong.

Shillong,  
The 3rd July 1920.

J. McSWINEY,  
Director of Land Records and  
Agriculture, Assam.

## APPENDIX L

## Preliminary Forecast of the Jute Crop of Assam for 1920.

District.	Normal area under jute.	Area under jute.		Difference between the figure now estimated for 1920 and the final of 1919.		Whether much, little or no jute remains in the district from the crop of 1919.	Date by which the sowing of the crop generally commenced this year and whether this date was early, normal, or late.	Remarks by Deputy Commissioner.
		Final of 1919.	Now estimated for 1920.	Increase.	Decrease.			
1	2	3	4	5	6	7	8	9
Cachar	Acres. 200	Acres. 400	Acres. 200	...	200	None	April: normal	The decrease in area as compared with the final figure of last year is due to (1) excessive rain in the latter part of March and 1st part of April, (2) fall in the price of jute, and (3) the greater necessity for growing the autumn rice crop.
Sylhet	Acres. 14,000	Acres. 14,100	Acres. 20,200	...	1,900	Most	Beginning of April: late.	The weather has been unfavourable up till now and the outcome is likely to be worse than last year. The excessive rainfall at sowing time, the low price of jute last year and the large quantities of jute remaining unsold account for the decrease of area from last year. The rain during the period has been sometimes heavy and sometimes very and thus caused slight damage to the crop. On the whole the weather is not favourable and the outcome is likely to be worse than last year.

Goalpara ...	47,400	60,000	55,500	4,000	March	March, normal	The weather was not favourable at sowing time which is the cause of the decrease in area, nor has it been favourable up till now. Insects and hail storms did some damage. The present condition of the crop is not good and is worse than last year.
Kamrup ...	8,100	17,000	15,200	1,100	Little	18th March, early	The decrease in area as compared with last year's actual is due to excessive rainfall at the time of sowing. The weather has been unfavourable and some damage has been done to the crop by insects. The present condition of the crop is not good and the prospects are worse than in the previous year.
Darrang ...	7,000	10,100	9,500	500	Some	Middle part of April : normal.	The weather on the whole has not been unfavourable and the outturn is not better than last year.
Nongpang ...	5,700	15,800	15,100	500	Much	1st April : normal	The increase in area from the actual of last year is due to extension of cultivation chiefly by the Mirmansingh settlers and to some extent by local weather and also due to the favourable weather at sowing time. The weather in April and May was less favourable owing to insufficient rain and the early growth of the crop was retarded to some extent, but the recent rain has done much good. The outturn is therefore expected to be normal or the same as last year.
Sibsagar ...	300	500	400	100	Little	Middle of March : normal.	The weather has been unfavourable from time of sowing up till now and hence the fall in area from the actual of last year : the outturn also will be a little less than last year.
Lakhimpur	200	300	300	None	None	1st April : normal	The weather was rainy at the time of sowing and has been unfavourable up till now. The present condition of the crop is fair.
Caro Hills	4,100	4,500	4,700	100	Ditto	18th April : late	The want of timely rainfall at sowing time is the cause of the decrease in area. The weather has not been favourable to the crop and the present condition is not good. The outturn is likely to be worse than last year.
Total	84,100	157,500	155,100	200	12,500		

• On the basis of actual final figures.

Sanitary Commissioner, Assam.

### Report on the Weather and Crops for the week ending the 9th July 1920.

**SUMMARY.**—Weather generally seasonable. Plucking of tea, harvesting of autumn rice and jute and cultivation of winter rice continue. Prospects of crops are fair. Cattle-disease is reported from five districts. The price of common rice is practically stationary.

Serial No.	Districts and subdivisions.	Rainfall at head-quarters stations.	Price of common rice, in seers, per rupee.		Character of the weather, etc.
			This week	Previous week.	
1	2	3	4	5	6
1	CACHAR (SILCHAR).	2.37	4½	4½	Weather reasonable: but more rain is wanted. Transplantation of winter rice has commenced. Prospects of crops are fair. Cattle-disease is still reported from places.
	Hailong	2.12	4½	4½	
	Hailakandi	4.46	4½	4½	
2	SYLHET ..	6.45	5	4½	Weather seasonable. Sowing and transplantation of winter rice, plucking of tea and harvesting of autumn rice are in progress. Out-turn of autumn rice is fair. Prospects of crops are generally fair.
	Sunamganj	4.84	5½	5½	
	South Sylhet	2.85	4½	4½	
	Karimganj ..	3.87	4½	4½	
	Holiganj ..	6.60	4½	4½	
3	KHASI AND JAINTEA HILLS (SHILLONG).	1.88	4½	4½ <sup>9</sup>	Weather seasonable. Harvesting of potatoes and sowing of paddy and cotton are in progress. Outturn of potatoes is not good. Cattle-disease is reported near Shillong.
	Jowai	§	§	4½	
4	NAGA HILLS (KOHIMA).	1.73	6½	7	Weather seasonable. More rain is wanted in Sadr for transplantation and growth of paddy. Prospects of crops are poor in Sadr. Cattle-disease is reported from Sadr.
	Mokokchung	12.90	10	10	
5	LUSHAI HILLS (AIZAL).	2.20	3½	3½	Weather seasonable and favourable.
	Lungleh ..	7.47	†	†	
6	GOALPARA (DHUBRI).	1.75	4½	4½	Weather seasonable. Cultivation of transplanted winter rice and harvesting of jute and autumn rice are in progress. Some damage to jute by heavy rain is reported from Goalpara. Prospects of autumn rice and jute are fair.
	Goalpara ...	2.15	5	5	
7	KAMRUPI (GAUHATI).	2.93	5½	5½	Weather seasonable and favourable to crops. Cultivation of winter rice is in progress. Prospects of crops are fair. Cattle-disease is reported from two mauzas.
	Barpeta ...	.54	5	5	

† Rice not sold.

Same Value and Hill Districts.

Assam Valley Division.

J. McSWINEY,

Director, Department of Land Records and Agriculture, Assam.

## Report on the Weather and Crops for the week ending the 16th July 1920.

**SUMMARY.**—Weather seasonable. Harvesting of autumn rice and jute, plucking of tea and transplanting of winter rice are in progress. Outturns of autumn rice, jute and tea and prospects of standing crops are generally fair. Cattle-disease is reported from 8 districts. The price of common rice is practically stationary in Surma Valley and rose slightly in Assam Valley.

Serial No.	Districts and subdivisions.	Rainfall at head-quarters stations.	Price of common rice, in seers, per rupee.		Character of the weather, etc.
			This week.	Previous week.	
1	2	3	4	5	6
1	CACHAR ... (SILCHAR). Haflong .. Hailakandi ..	2.77 1.23 4.63	4½ 4½ 4½	4½ 4½ 4½	Weather seasonable and hot. Ploughing for and transplantation of winter rice are going on. Harvesting of autumn rice has commenced: outturn is poor. Prospects of crops are fair. Cattle-disease is still reported from places.
2	SYLHET ... Sunamganj .. South Sylhet .. Karinganaj .. Habiganj ...	6.07 8.14 .55 3.12 1.03	4½ 5½ 5 4½ 5½	5 5½ 4½ 4½ 4½	Weather hot with occasional showers. Sowing and transplantation of winter rice, plucking of tea and harvesting of autumn rice are in progress. Outturns of autumn rice and tea are fair. Prospects of crops are generally fair.
3	KHASI AND JAINTHIA HILLS (SHILLONG). Jowai ..	1.97 2.12	4½ 5	4½ 5	Weather seasonable and harvesting of potatoes is in progress. Outturn of potatoes is not good. Cattle-disease is reported near Shillong.
4	NAGA HILLS (KOHIMA). Mokokchung	2.42 5.87	6 10	6½ 10	Weather seasonable. More rain is wanted in Sadr for transplantation and growth of paddy. Harvesting of <i>ihum</i> paddy and millet has commenced. Prospects of crops are poor in Sadr and fair in Mokokchung. Cattle-disease is reported from Sadr.
5	JURHAI HILLS (AJMAL). Lungleb ..	2.50 2.30	3½ 3½	3½ †	Weather seasonable and favourable. Prospects of crops are fair.
6	GOALPARA (DHUBRI). Goalpara ...	2.18 1.59	4½ 5	4½ 5	Weather seasonable. Sowing of transplanted winter rice is nearly finished. Harvesting of jute and autumn rice are in progress. Flood is reported to have caused slight damage to autumn rice in Goalpara. Prospects of autumn rice and jute are fair.
7	KAMRUPT (GAUhati). Barpeta ...	1.05 1.78	5½ 5	5½ 5	Weather seasonable and favourable to crops. Transplantation of winter rice continues. Prospects of crops are fair. Cattle-disease is reported from three mauzas.

† Rice not sold.

**Report on the Weather and Crops for the week ending the 16th  
July 1920—concluded.**

Serial No.	Districts and subdivisions.	Rainfall at head- quarters stations.	Price of common rice, in seers, per rupee.		Character of the weather, etc.

FIRST FORECAST OF THE COTTON CROP OF ASSAM,  
1920-21.

[NOTE.—On the average of the five years ending 1918-19, the area under cotton crop in Assam represents some 0·2 per cent. of the total area under cotton in India.]

As estimated by the Deputy Commissioners the area under cotton this year is 34,000 acres against 33,000 acres of last year. The prospects of the crop are promising except in Sylhet and Naga Hills.

CAMP JORHAT:

*The 5th August 1920.*

J. McSWINEY,

*Director of Land Records and  
Agriculture, Assam.*

## Report on the Weather and Crops for the week ending the 6th August 1920.

**SUMMARY.**—Weather seasonable and hot: more rain is wanted in most districts. Harvesting of autumn rice, jute and *ihum* crops, plucking of tea and transplanting of winter rice continue. Outturns and prospects of crops are generally fair. Cattle-disease is reported from seven districts. The price of common rice is practically stationary.

Serial No.	Districts and subdivisions.	Rainfall at head-quarters stations.	Price of common rice, in seers, per rupee.		Character of the weather, etc.
			This week.	Previous week.	
1	2	3	4	5	6
1	CAORAE ... (SILCHAR).	3.62	4½	4½	Weather seasonable and beneficial to crops but more rain is wanted. Transplantation of winter rice and harvesting of autumn rice are in progress. Insects are reported to have damaged the autumn rice crop. Outturn of autumn rice is poor. Prospects of standing paddy crop are hopeful. Cattle-disease is still reported from places.
	Hailong ..	1.28	4½	4½	
	Hailakandi ...	3.69	4½	4½	
2	SYLHET ...	6.91	4½	4½	Weather hot, and more rain is wanted. Sowing and transplantation of winter rice, plucking of tea and harvesting of autumn rice and jute are in progress. Outturns and prospects of crops are generally fair.
	Sunamganj ...	8.27	5½	5½	
	South Sylhet .	3.79	4½	4½	
	Karimganj ...	3.33	5	5	
	Habiganj ...	2.16	5½	5½	
3	KHASI AND JAINTEA HILLS (SHILLONG).	2.77	4½	4½	Weather seasonable: rain is badly wanted in the northern portion of Jowai subdivision. Harvesting of potatoes and maize is in progress. Outturn of potato is poor and of maize fair. Insects are reported to have damaged paddy crop in Jowai subdivision.
	Jowai ...	2.25	5	5	
4	NAGA HILLS (KOHIMA).	4.64	6½	6½	Weather seasonable but more rain is still wanted in sadr. Transplantation of winter rice and harvesting of <i>ihum</i> paddy and millets are in progress. Prospects of crops are poor in sadr and fair in Mokokehaug. Cattle-disease is reported from places.
	Mokokehaug	3.50	10	10	
5	LUSHAI HILLS (AIZAL).	4.68	3½	3½	Weather seasonable and favourable. Outturns and prospects of crops are fair.
	Lungleh ...	4.49	†	†	
6	GOALPARA (DHUBRI).	1.57	5	5	Weather seasonable: more rain is wanted in sadr subdivision. Harvesting of jute and autumn rice and transplanting of winter rice continue. Prospects of crops are fair. Cattle-disease is reported from Goalpara.
	Goalpara ...	6.04	5	5	
7	KAMRU (GAUHATI).	1.07	4½	4½	Weather very hot: more rain is wanted. Transplanting of winter rice continues and prospects are moderate. Cattle-disease is reported from four mauzas.

FIRST FORECAST OF THE SUGARCANE CROP OF ASSAM,  
1920-21.

[NOTE.—On the average of the five years ending 1918-19, the area under sugarcane in Assam represents some 1·4 per cent. of the total area under sugarcane in British India.]

The season so far has been good, although the rainfall was somewhat short in July. On the whole the prospects of the crop are favourable and a normal outturn is expected.

As estimated by the Deputy Commissioners, the area under sugarcane is 34,600 acres against 32,500 acres in last year: the increase in area is due to favourable weather at planting time and the high price of *gur*. The outturn is estimated to be 99 per cent. of the normal per acre against 98 in 1919-20.

CAMP JORHAT:  
*The 6th August 1920.*

}

J. McSWINEY,  
*Director of Land Records and  
Agriculture, Assam.*

## APPENDIX.

## First Forecast of the Sugarcane Crop of Assam for 1920-21.

District.	Approximate area under normal sugarcane.	Estimated area under sugarcane as preliminary forecast.	Estimated area under sugarcane this year.	Taking 100 to represent the normal outturn per acre, what would represent the average outturn.		Date by which the planting of sets generally commenced this year and whether that date was early, normal or late.	Remarks by District Officers.
				As in last year's preliminary forecast.	Estimated this year.		
1	2	3	4	5	6	7	8
Cachar	7,300	4,900	6,900	100	100	April: normal	The favourable weather and the high price of sugar account for the increase in area. The character of weather and the present prospects of the crop are favourable.
Sylhet	7,000	4,900	6,900	100	100	Beginning of April: normal	The weather has been favourable and the prospects of the crop are good.
Goalpara	1,300	1,300	1,400	85	70	First part of April: normal	The high price of sugar is the cause of the increase in area. The weather at planting time and up till now has been fair but hailstorms did some damage to the crop.
Kamrup	5,500	4,300	4,500	100	90	1st April: early	The increase in area as compared with last year is due to favourable weather at planting time. The condition of crop is fair.
Bongaigaon	2,700	1,800	2,300	100	100	End of April: normal	The increase in area from that of last year is due partly to the high price of sugary and partly to favourable weather at the time of planting. The prospects of the crop are good.

<p>                     The abnormal rise in price of sugar and per has encouraged the people to grow more. The weather has been favourable and the prospects of the crop are satisfactory.                 </p> <p>                     The weather was favourable at planting time but afterwards it was not good owing to the absence of rain. The present condition of the crop is fair.                 </p> <p>                     The decrease in area is due to the migration of Kacharis settlers who mainly grow the crop. The character of the weather during the season has been good.                 </p>	1st April : early	100	70	3,000	2,000	1,000	—
	Middle of April : early	100	100	5,000	5,000	5,000	—
	1st April : normal	110	110	3,000	4,000	2,700	—
	1st May : late	100	100	700	700	600	Sadiya Frontier Tract
Total				34,000	29,000	28,700	—

## Report on the Weather and Crops for the week ending the 13th August 1920.

SUMMARY.—Weather seasonable and hot: more rain is wanted in most districts. Harvesting of autumn rice, jute and *ihum* crops, plucking of tea and transplanting of winter rice continue. Outturns and prospects of crops are generally fair. Cattle-disease is reported from eight districts. The price of common rice is stationary.

Serial No.	Districts and subdivisions.	Rainfall at head-quarters stations.	Price of common rice, in seers, per rupee.		Character of the weather, etc.
			This week	Previous week.	
1	2	3	4	5	6
1	CAOHAZ (SILCHAR).	4.80	5	4½	Weather seasonable and beneficial to crops but more rain is wanted. Transplantation of winter rice and harvesting of autumn rice continued. Outturn of autumn rice is poor. Prospects of standing crops are hopeful. Cattle-disease is still reported from Hailakandi and Hailong subdivisions.
	Hailong	1.01	4½	4½	
	Hailakandi	4.28	4½	4½	
2	SYLHET ...	5.98	4½	4½	Weather hot, and more rain is wanted for winter rice. Transplantation of winter rice, plucking of tea and harvesting of autumn rice and jute are in progress. Outturns and prospects of crops are generally fair.
	Sunamganj	6.12	5½	5½	
	South Sylhet	3.70	4½	4½	
	Karimganj	4.47	5	5	
	Hailiganj	3.02	5½	5½	
3	KHASI AND JAINTHIA HILLS (SHILLONG).	.82	4½	4½	Weather seasonable: more rain is badly wanted in the northern portion of Jowai subdivision. Harvesting of potatoes and maize continues. Outturn of potato is poor and of maize fair. Insects are reported to have damaged paddy crop in some places in the Jowai subdivision.
	Jowai	3.05	4½	5	
4	NAGA HILLS (KOHIMA).	.85	6½	6½	Weather seasonable. Transplantation of winter rice and harvesting of <i>ihum</i> paddy and millets continue. Prospects of crops are poor in sadr and fair in Mokokchhang. Cattle-disease is reported from sadr.
	Mokokchhang	3.40	10	10	
5	LUSHAI HILLS (AIZAL).	.82	3½	3½	Weather seasonable and favourable. Outturns and prospects of crops are fair.
	Lungleh	3.05	†	†	
6	GOALPARA (DHUBRI).	1.15	5	5	Weather seasonable: more rain is badly wanted in some places. Harvesting of jute and autumn rice and transplanting of winter rice continue. Prospects of crops are fair. Cattle-disease is reported from Goalpara.
	Goalpara	.78	5	5	
7	KAMRUP (GAUHATI).	1.25	4½	4½	Weather very hot: more rain is wanted. Transplantation of winter rice continues. Cattle-disease is reported from one circle.
	Barpeta	1.57	5	5	

† Not available.

Chittagong,  
The 10th September 1920.

G. A. WILBY,  
Acting Chief Auditor.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, ASSAM.

FINAL FORECAST OF THE JUTE CROP OF ASSAM, 1920.

[NOTE.—On the average of the five years ending 1918, the area under jute in Assam represents some 3·5 per cent. of the total area under jute in British India.]

1. *Season*.—As indicated in the preliminary forecast, excessive rain at the sowing time diminished the area sown and the dry weather of April and May was unfavourable for growth. The weather in June and July improved prospects, but too much damage had been done already.

2. *Area*.—The area under jute as reported by the Deputy Commissioners is 118,200 acres against the final figure of 137,300 acres of last year and 125,100 acres shown in the preliminary forecast of this year. The decrease is due to unfavourable weather conditions and low prices. Five districts have revised the areas reported in the preliminary forecast.

3. *Outturn*.—The percentage of outturn is estimated to be 66 of the normal against 73 (revised) in last year.

On the basis of the area and percentage outturn and taking 3·8 bales of 400 lbs. as the normal yield per acre, the total gross yield of the Assam crop this year comes to 259,000 bales against 332,400 bales, the revised figure for last year, or a decrease of 22 per cent.

J. McSWINEY,

*Shillong,*  
*The 13th September 1920.*

} *Director of Land Records and  
Agriculture, Assam.*

**APPENDIX I.**  
**Final Forecast of the Jute Crop of Assam, 1920.**

District.	Estimated normal area under jute.	Estimated area under jute.		Estimated cotton as a percentage of the normal yield per unit of area.		Estimated total yield in taes of 40 lbs.		Date by which the harvesting was commenced and whether that date was early, normal or late.	Remarks by Deputy Commissioners.
		Last year (actual). <sup>a</sup>	This year.	Last year.	This year.	Last year. <sup>a</sup>	This year.		
1	2	3	4	5	6	7	8	9	10
Cochar ..	Acres. 200	Acres. 200	Acres. 200	90	90	Est. 1,500	Est. 400	August; normal	There was heavy rain at the sowing time. The weather was not favourable for the growth of the crop.  The decrease in area as compared with the actual of last year is due partly to excessive rain at the time of sowing and partly to the low price of jute which has been replaced by rice in many places. The weather has been unfavourable.  The decrease in area is due to the fact that a very large stock remained last year with the cultivators on account of the low price. The weather was unfavourable at sowing time and it continued so throughout the season. Floods and hailstorms damaged the crop to some extent.  The weather was not favourable at sowing time on account of incessant rain but subsequently improved somewhat. Some damage was done by floods and insects.
Sylhet ..	10,000	24,100	14,500	65	60	58,800	28,200	Beginning of September; late.	
Goalpara ..	42,408	20,000	53,000	61	50	130,900	30,700	Latter part of June; early	
Kamrup ..	8,100	17,000	18,100	68	70	53,200	34,900	1st week of August; normal.	

Darrang	...	7,000	10,100	10,100	80	86	26,000	31,000	August; normal	...	The character of weather in andr was good but was unfavourable in the Shangkai Subdivision where some damage was caused by floods.
Morgong	...	5,700	12,500	13,900	90	86	55,000	50,300	1st July; early	...	The slight increase in area is due to ordinary extension of cultivation. The weather was not too favourable to the crop. Some damage was caused by drought and insect pests.
Silchar	...	200	500	400	95	70	1,500	1,000	20th August; normal	...	The weather has been unfavourable throughout the season. The decrease in output is chiefly due to rain after sowing.
Lakhimpur	...	200	250	200	94	95	600	600	15th September; normal	...	The character of weather has been fair except that there was heavy rain at sowing time and hence the output is estimated to be slightly below normal.
Garh Hills (plains)	...	4,100	4,200	4,100	100	90	13,000	12,300	18th July; normal	...	The weather was unfavourable at the sowing time but from June to August was generally favourable.
Total	...	84,100	127,300	116,300	73*	86	332,400*	224,000			

\* On the basis of the actual and figures.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, ASSAM.

---

PRELIMINARY FORECAST OF THE AUTUMN RICE CROP OF ASSAM, 1920.

---

[NOTE.—On the average of the five years ending 1918, the area under autumn rice in Assam represents some 1·1 per cent. of the total area under rice in British India.]

There was unusually heavy rain in February and March followed by a shortage in April and May: there was favourable rain in June followed by a second deficiency in July and heavy rains in August. The weather at the beginning of the season was generally favourable for early sowing, but growth was stopped by want of rain.

As estimated by the Deputy Commissioners the total area of the province comes to 771,400 acres against 718,600 acres reported in the corresponding forecast of last year. The increase is shared by all districts except Kamrup, Sibsagar and Garo Hills.

The percentage outturn for the province is estimated to be 72 as in the preliminary forecast of last year.

SHILLONG,	)	J. McSWINEY,
The 17th September 1920.	)	Director of Land Records and
		Agriculture, Assam.

STATEMENT.

## Preliminary Forecast of the Autumn Rice Crop of Assam, 1920.

District.	Estimated normal area under autumn rice.	Estimated area under autumn rice.		Estimated outturn as a percentage of the normal yield per unit of area.		Date by which the sowing of the crop began this year and whether that date was early, normal or late.	Remarks by Deputy Commissioners.
		As in last year's preliminary forecast.	This year (1920.)	As in last year's preliminary forecast.	This year (1920.)		
1	3	3	4	5	6	7	8
Cachar	43,000	37,800	41,300	75	70	Middle of June: late.	Last year's shortage and high prices increased the area. The weather was bad at the beginning but it became seasonable later. Insect pests are reported to have damaged the crop by nearly 25 per cent.
Sylhet	218,000	194,300	194,300	78	85	End of April: normal.	The increase in area is due to favourable weather at sowing time. The weather continued to be favourable up till now except that in July there was drought which interfered with the full development of the crop.
Goswari	104,000	130,300	134,900	70	60	March: normal.	There was a general extension of cultivation in the district this year. The season was not favourable owing to alternative floods and dry spells of weather. Floods are reported to have damaged the crop in the low-lying tracts to a certain extent.

Kamrup	175,000	170,000	165,000	70	60	Broadest crop, middle of February: normal. Transplanted crop—end of April: normal.	The weather was not favourable at sowing time on account of incessant rain but it has been so up till now. Some damage has been done by insects and floods.
Larrang	44,000	38,300	32,500	60	70	Broadest—February: normal. Transplanted—end of June: late.	The weather was favourable for sowing time but became bad afterwards. It changed favourably in the latter part of the season.
New gong	44,000	38,300	32,000	65	70	March: early	The increase in area is due to extension of cultivation on account of the high price of rice. At the beginning the weather was unfavourable and afterwards it became fair, but the want of water retarded the growth of the crop.
Sibsagar	25,000	27,000	24,000	70	75	15th March: normal.	The weather at sowing time was not favourable and hence the small decrease in area. There was no regular rain during the season and the growth of the crop was thereby retarded to some extent. Some damage was done by floods in some and Sibsaigar subdivisions.
Lakhimpur	11,000	17,000	17,500	92	93	18th February: normal.	The increase in area as compared with the preliminary forecast of last year is due to extension of cultivation on account of favourable weather. The character of weather was favourable. Some damage from flood is reported from North Lakhimpur subdivision.
Garo Hills	16,000	10,300	10,000	100	55	18th February: early.	The weather was favourable at sowing time but unfavourable in March and April on account of drought which retarded the growth of the crop to some extent.
Other districts	122,200	128,300	133,200	...	...		
Total	664,200	710,000	771,000	72	72		

## Report on the Weather and Crops for the week ending the 1st October 1920.

**SUMMARY.**—Weather seasonable. Harvesting of autumn rice and jute and transplanting of winter rice are almost finished. Plucking of tea and ploughing for and sowing of pulses are in progress. Prospects and outturns of crops are generally fair. Cattle-disease is reported from four districts. The price of common rice is practically stationary.

Serial No.	Districts and subdivisions.	Rainfall at head-quarters stations.	Price of common rice, in seers, per rupee.		Character of the weather, etc.
			This week	Previous week.	
1	2	3	4	5	6
1	CACHAR ... (SILOHAR).	3.17	4½	4½	Weather seasonable: recent rains are beneficial to standing paddy crop. Plucking of tea continues with good outturn. Transplanting of winter rice is nearly finished. Prospects of winter rice are fair.

SECOND FORECAST OF THE COTTON CROP OF ASSAM.  
1920-21.

---

[NOTE.—On the average of the five years ending 1918-19, the area under cotton crop in Assam represents some 0·2 per cent. of the total area under cotton in India.]

As estimated in the first forecast the area under cotton is 34,000 acres. Except in Sylhet and Naga Hills prospects continue to be promising.

L. B. WARD,  
Deputy Comptroller, Assam.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, ASSAM.

SECOND FORECAST OF THE SUGARCANE CROP OF ASSAM, 1920-21.

[NOTE.—On the average of the five years ending 1918-19, the area under sugarcane crop in Assam represents some 1·4 per cent. of the total area under sugarcane in British India.]

The area under sugarcane is the same as indicated in the first forecast, i.e., 34,600 acres. The prospects of the crop continue to be good since the issue of the first forecast on account of good rain in August and September.

SHILLONG :

The 7th October 1920.

J. McSWINEY,

Director of Land Records and  
Agriculture, Assam.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, ASSAM.

FIRST FORECAST OF THE WINTER RICE CROP OF ASSAM, 1920-21.

[NOTE.—On the average of the five years ending 1918-19, the area under winter rice in Assam represents some 4·5 per cent. of the total area under rice in British India.]

*Character of the season.*—The season was not generally good for the sowing of broadcast rice, but it was very favourable for its growth and for the transplanted crop. The recent rains have improved the prospects of both crops which appear on the whole good.

*Area sown.*—2. There was extension of cultivation under winter rice in all districts except Sibsagar and Garo Hills and the total area of the province is estimated to be 3,291,000 acres or 1 64,200 acres more than in the corresponding forecast of last year. The increase is due to high price of rice and favourable weather at transplanting time.

*Outturn.*—3. As estimated by the Deputy Commissioners the average outturn for the province comes to 97 per cent. of the normal per acre against 72 in the preliminary forecast of last year.

SHILLONG :	}	J. McSWINEY,
The 2nd October 1920.		Director of Land Records and Agriculture, Assam.

## APPENDIX I.

*First Forecast of the Winter Rice Crop of Assam, 1920-21.*

District.	Estimated area under winter rice.			Estimated outturn as a percentage of the normal yield per unit of area.		Date by which the transplanting of winter rice was begun this year and whether that date was early, normal or late.	Remarks by Deputy Commissioner.
	Normal.	As in last year's first forecast.	This year.	As in last year's first forecast.	This year.		
1	3	3	4	5	6	7	8
Cherap	158,000	146,000	153,000	60	86	Middle of July: normal.	The weather has been favourable and hence the increase in both the area and outturn. The prospects of the crop is satisfactory.
Sylhet	1,775,000	1,440,000	1,574,000	76	100	Beginning of August: normal.	The increase in area was due to favourable weather condition at sowing time. The broadcast crop suffered a little but the transplanted crop looks promising. On the whole the weather has been fairly good and out-turn is expected to be normal.
Goalpara	225,000	242,000	260,000	55	60	First week of July: normal.	The high price of paddy was the cause of the increase in area. At the beginning of the season the weather was not favourable, but improved subsequently. The effects of weather towards the growth of the crop is good, but floods, heavy rain and insects damaged the crop to some extent in low-lying parts.

Kamrup	324,000	349,000	274,000	60	20	21st March: normal	15th July: normal	The increase in area is due to favourable weather at the time of transplantation and the extension of cultivation by Mohammedan immigrants. The weather was not good at sowing time, but it has since become favourable afterwards. Some damage is reported to have been done by floods and insects.
Darrang	189,000	167,000	199,400	70	20	In Sade—April: normal In Manipal—End of May: late.	Last week of July: normal.	The increase in area is shared by both the subdivisions. The character of weather at the time of sowing was not favourable but became good at transplanting time and continues to be so till now. Some damage has been done to the crop by insects in the Behali circle.
Nowrang	124,000	154,500	162,000	60	75	12th March: early	Middle of July: normal.	The area shows an increase as compared with last year on account of favourable weather at sowing time, extension of cultivation by new settlers and high price of rice. For transplanting the weather was not good at the beginning owing to want of rain and flood water, but improved somewhat later on. Some damage has been done to the crop by drought and insects.
Shimgar	345,000	353,000	340,300	100	100	Middle of March: early	Middle of July: normal.	The area is less than last year owing to prevalence of cattle-disease in some places and to want of sufficient rain at sowing time. The weather improved subsequently. Insect pests are reported to have caused slight damage to the crop in some places.
Lakimpur	132,000	164,700	171,000	95	100	1st April: normal	16th July: normal	The increase in area is due to extension of cultivation on account of favourable weather. The weather has been favourable during the season and the outturn is expected to be normal.
Garo Hills (plains)	23,000	25,000	24,000	100	100	20th March: early	20th July: normal	The weather was unfavourable at sowing time but improved from the beginning of May and is at present very favourable to the crop.
Other districts	74,000	75,000	73,000	—	—			
Total	3,441,000	3,126,000	3,251,000	73	97

Chittagong,

The 10th December 1920.

G. A. WILBY,

Acting Chief Auditor.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, ASSAM.

FINAL FORECAST OF THE AUTUMN RICE CROP OF ASSAM, 1920.

[NOTE.—On the average of the five years ending 1918, the area under autumn rice in Assam represents some 1·1 per cent. of the total area under rice in British India.]

The unfavourable weather conditions of the season have already been described in the preliminary forecast issued on 17th September.

2. As estimated by the Deputy Commissioners the total area under autumn rice crop is 784,300 acres against last year's actual area of 737,200 acres, and the average outturn per acre for the province comes to 73 per cent. of the normal against 75 of last year. The estimates of area reported in the preliminary forecast have been revised in five districts and those of outturn in seven.

On the basis of the normal yield of 6·3 cwt. per acre the total produce of the province is calculated to be 3,807,000 cwt. or nearly 4 per cent. more than last year.

<i>Camp Gauhati,</i>	}	<i>J. McSWINEY,</i>
<i>The 15th December 1920.</i>		<i>Director of Land Records and</i>
		<i>Agriculture, Assam.</i>

## APPENDIX I

## Final Forecast of the Autumn Rice Crop of Assam, 1920.

District.	1	2 Estimated normal autumn rice area under	Area under autumn rice.		Estimated output as a percentage of the normal yield per unit of area.		Date by which the crop leaves this year and whether that date was early, normal or late.	Remarks by Deputy Commissioners.
			Actual of last year.	Estimated this year.	Last year.	This year.		
	3	4	5	6	7	8		
Cachar	..	42,000	45,500	41,200	96	97	Broadest rice by end of July: normal.—Transplanted by early September: normal.	The decrease in area is due to insufficient rain at the beginning of the season. Some damage has been reported to have been done by moss insects.
Sylhet	..	518,000	146,300	192,500	80	80	Beginning of August: normal.	The weather at sowing time was favourable and increased the area, but it was unfavourable at growing time.
Goalpara	..	100,000	124,400	184,200	70	68	Beginning of July: normal.	This year the weather was not so favourable as last year at the beginning of the season. Floods and drought damaged the crop to a certain extent.

	175,000	167,000	160,000	70	70	July: normal.	
Kamrup	...	...	...	...	...	...	The decrease in area as compared with that of last year's actual and with the preliminary forecast of this year is due to excessive rainfall at the time of sowing. The outturn was below normal owing to the damage done partly by insects and partly by floods.
Darrang	44,000	37,000	40,000	70	80	Broadcasted, middle of June normal. Transplanted, end of September: normal.	The failure of transplanted winter rice last year was mainly the cause of the decrease in area under autumn rice this year. The outturn has been estimated to be below normal on account of unfavourable weather in the first part of the season.
Nowgong	44,000	52,000	39,000	70	70	1st July: normal	The area remains the same as reported in the preliminary forecast and shows an increase as compared with the actual of last year on account of high price of rice. The want of sufficient rain in June and July is responsible for the low outturn.
Sibsagar	25,000	24,000	24,000	90	72	Middle of June: early.	The outturn has been estimated to be below normal on account of unfavourable weather at growing time.
Lakhimpur	31,000	19,700	19,000	90	98	10th July: normal.	The decrease in area as compared with the actual of last year was due to unfavourable weather and floods in the North Bank manas where autumn rice is largely grown.
Caro Hills (Plains)	10,000	19,000	10,100	100	96	15th July: normal.	The want of sufficient rainfall in March and April has been the cause of the low outturn.
Other districts	125,000	155,000	150,000	...	...	...	
Total	844,000	792,000	794,000	76	73		

## APPENDIX II.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, ASSAM.

THIRD FORECAST OF THE COTTON CROP OF ASSAM,  
1920-21.

[NOTE.—On the average of the five years ending 1918-19, the area under cotton crop in Assam represents some 0·2 per cent. of the total area under cotton in India.]

As estimated in the first and second forecasts the area under cotton is 84,000 acres against 33,000 acres shown in the corresponding forecast of last year. Rain at flowering time in Nowgong and Garo Hills injured the crop to some extent and damage is reported from drought, insects and rats in three districts. The total outturn of the province is estimated to be 12,000 bales against 13,000 bales of last year.

Camp Jorhat,  
The 9th December 1920. }

J. McSWINEY,  
Director of Land Records and  
Agriculture, Assam.

Third Forecast of the Cotton Crop of Assam, 1920-21.

District.	Area, in acres.				Yield in bales of 400 lbs. each.							Remarks by District Officers.
	Of current year's crop.	Of previous year's crop.	Average of preceding—	Percentage by which column exceeds (+) or is less than (-) area in—		Estimated yield of current year (i.e., area in column 3).	Estimated yield of previous year (i.e., area in column 2).	Average of preceding—	Percentage by which column 7 exceeds (+) or is less than (-) yield in—		Date by which the harvesting generally commenced this year and whether that date was early, normal or late.	
				Column 2.	Column 4.				Column 8.	Column 9.		
1	2	3	4	5	6	7	8	9	10	11	12	13
Dyball	400	400	500	1,000	...	...	100	200	...	Five years. —40 Ten years. —75	Middle of November : normal.	The weather from August to November was somewhat fair.
Khad and Jaintia Hills.	1,000	1,000	500	600	...	...	400	200	...	Five years. +100 Ten years. +67	18th January : normal.	The weather in August and September was wet; it was seasonable in October and November and the prospects of the crop are favourable or same as last year.
Naga Hills	600	600	...	...	...	...	300	...	...	Five years. —60 Ten years. —	1st October : normal.	The outturn will probably be less as the crop was damaged by prolonged drought.

Lushai Hills ...	6,000	6,000	17,500	7,700	...	-20	+300	1,800	1,800	2,000	2,300	...	-25	-35	Mid-November: early.	The weather has been suitable for cotton and the crop is in good condition. The output is expected to be the same as last year.
	4,400	4,100	4,400	6,500	+7	...	...	1,000	1,000	1,300	1,500	...	-33	-33	First November: early.	
Nowgong ...	1,000	1,000	...	420	+50	+167	+300	400	300	300	...	+33	100	...	18th November: early.	The increase in area is due to extension of cultivation. The weather has been favourable to the crop and the prospect are good.
	1,000	1,000	...	...	...	...	...	8,300	8,900	7,300	6,900	-7	+18	+30	25th November: normal.	
Garo Hills (Hills).	19,900	19,900	18,500	19,100	...	+5	-1	...	...	...	...	...	...	...	...	The continuous rain from the middle of September to the first week of October has interrupted the cotton plants which are out in that period. Bats are expected to have caused much damage to the crop in season No. 1. On the whole the condition of the crop is worse than last year.
	700	900	...	...	-23	...	...	300	400	...	...	-30	...	...	...	
Other districts	...	...	...	...	...	...	...	...	...	...	...	...	...	...	...	The area as compared with last year is larger on account of high prices of cloth and heavy rain in August and September i.e., at the flowering time, and this did some harm to the crop. In October and November, owing to scanty rainfall, insects appeared and damaged the crop to the extent of about 12 1/2 per cent.
Total ...	33,600	32,900	32,100	34,900	+2	+5	-4	12,100	12,900	11,500	11,100	-6	+8	+9	...	
In round figures	34,000	33,000	32,000	35,000	...	...	...	12,000	13,000	11,000	11,000	...	...	...	...

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, ASSAM.

SECOND FORECAST OF THE WINTER RICE CROP OF ASSAM  
1920-21.

[Norm.—On the average of the five years ending 1918-19, the area under winter rice in Assam represents some 4.6 per cent. of the total area under rice in British India.]

Weather conditions since the issue of the first forecast would have been much improved by later rain in October, but on the whole the prospects of both the broadcast and transplanted crops remain good.

2. The total area under the crop according to the Deputy Commissioners' estimates now amounts to 3,231,600 acres against 3,291,000 acres in the first forecast and the second forecast figure of 3,142,300 acres (revised) in last year: the increase is, as already indicated in the first forecast, due to the high price of rice and favourable weather at transplanting time. Five districts have raised the estimates of area shown in the first forecast with a net increase of 40,600 acres.

3. The average outturn is estimated to be 95 per cent. of the normal against 93 in last year. In Sylhet, Lakhimpur, Sibsagar and Garo Hills the outturn is estimated to be about normal: in the other districts the estimates range from 75 to 95 per cent. On the basis of the normal yield of 8.5 cwt. per acre, the total outturn of this year's crop is 26,902,700 cwt. or 8 per cent. more than last year.

*Camp Gauhati:*

*The 17th December 1920.*

J. McSWINEY,

*Director of Land Records and  
Agriculture, Assam.*

## APPENDIX I.

## Second Forecast of the Winter Rice Crop of Assam, 1920-21.

District.	Estimated normal area under winter rice.	Estimated area under winter rice.		Estimated outturn as a percentage of the normal yield per unit of area.		Date by which the winter rice began this year and whether that date was early, normal or late.	Remarks by Deputy Commissioners.
		As in last year's second forecast.	This year.	As in last year's second forecast.	This year.		
1	3	3	4	5	6	7	8
Cocher	As in last year's second forecast. 100,000	As in last year's second forecast. 100,000	As in last year's second forecast. 100,000	As in last year's second forecast. 75	As in last year's second forecast. 80	Third week of November: best prospect.	The increase in area as compared with 2nd forecast of last year is due to favourable weather and the high price of paddy. The outturn will be a little below normal on account of absence of rain at the end of October.
Bishup	As in last year's second forecast. 1,175,000	As in last year's second forecast. 1,400,000	As in last year's second forecast. 1,515,000	As in last year's second forecast. 100	As in last year's second forecast. 100	Middle of November: normal.	The increase in area is "due to favourable weather condition at sowing time. The weather continues to be generally favourable to the crop and the outturn is anticipated to be normal.
Goalpara	As in last year's second forecast. 225,000	As in last year's second forecast. 225,000	As in last year's second forecast. 225,000	As in last year's second forecast. 70	As in last year's second forecast. 75	End of November: normal.	The high price of paddy was mainly the cause of the increase in area. The weather was not favourable at the beginning but improved subsequently: floods and insects damaged the crop to some extent in the low-lying parts, and hence the outturn is estimated to be below normal.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, ASSAM.

PRELIMINARY FORECAST OF THE RAPE AND MUSTARD CROPS OF ASSAM, 1920-21.

[NOTE.—On the average of the five years ending 1918-19, the area under rape and mustard crops in Assam represents some 4·6 per cent. of the total area under the crops in British India.]

The weather was on the whole favourable for sowing and high prices increased the area in Cachar, Goalpara, Kamrup, Nowgong, Sibsagar and Lakhimpur. Since sowing the absence of rain has retarded growth.

As estimated by the Deputy Commissioners the total area under the crops is 298,300 acres, or nearly 10 per cent. more than the preliminary forecast of last year. The average outturn for the province is calculated to be 80 per cent. of the normal per acre against 82 in last year.

SHILLONG :

The 21st December 1920. }

J. McSWINEY,

Director of Land Records and  
Agriculture, Assam.

## APPENDIX.

## Preliminary Forecast of the Rape and Mustard Crops of Assam for 1920-21.

District.	Estimated area under rape and mustard crops.	Estimated area under rape and mustard crops.		Estimated output as percentage of the normal yield per unit of area.		Date by which the sowing of the crops began this year and whether that date was early, normal or late.	Remarks by District Officers.
		As in last year's preliminary forecast.	This year.	As in last year's preliminary forecast.	This year.		
1	2	3	4	5	6	7	8
Cachar	...	Acres. 10,000	Acres. 9,800	80	70	Early November: normal	The high price of mustard oil is the cause of the increase in area. The weather has not been satisfactory for the cultivation and growth of the crop.
Sylhet	...	55,000	40,000	100	100	End of October: normal	The condition of weather has been favourable during the season and the prospects are fair.
Golpara	...	22,400	22,500	70	70	End of October: normal	There was extension of cultivation under the crops on account of high prices. The weather has not been good for the growth of the crop.
Kamrup	...	67,000	40,700	75	80	Beginning of November: normal	The increase in area is due to favourable weather at sowing time; subsequent conditions have been fair.
Darrang	...	21,200	23,700	90	85	Middle of October: normal	The weather at sowing time was not favourable in Mangaldai and hence the decrease in area. The prospects of the crops are not very good.

**APPENDIX.**  
*Preliminary Forecast of the Rape and Mustard Crop of Assam for 1920-21—contd.*

District.	Estimated area under rape and mustard crops.	Estimated area under rape and mustard crops.		Estimated output as a percentage of the normal yield per unit of area.		Date by which the sowing of the crop began this year and whether that date was early, normal or late.	Remarks by District Officers.
		As in last year's preliminary forecast.	This year.	As in last year's preliminary forecast.	This year.		
1	2	3	4	5	6	7	8
Nowgong ...	Acres. 40,000	Acres. 38,000	Acres. 40,000	100	70	12th October : early	The increase in area is due to favourable weather at sowing time and to the good price of mustard throughout the year. The absence of rain since sowing has retarded growth.
Silchar ...	30,100	28,800	30,000	86	73	14th October : normal	The increase in area is due to favourable weather at the beginning. Since sowing the weather has not been favourable owing to want of rain.
Lakhimpur...	75,000	4,000	10,000	95	98	15th October : normal	Favourable weather led to an increase in area in North Lakhimpur. Prospects are fair.
Sadiya Frontier Tract	800	400	600	95	96	20th October : normal	The character of weather during the season has been fair.
Garo Hills ...	5,500	7,300	7,300	90	90	18th October : normal	The weather has been favourable.
Total ...	304,100	271,500	328,900	68	69
